

OBDELAVA KOVIN

Franc Junc s.p.

Obdelava kovin Franc Junc s.p. je majhno družinsko podjetje s petnajstimi zaposlenimi. Ustanovljeno je bilo leta 1981. Ukvarjamo se z obdelavo kovin na CNC obdelovalnih strojih, in sicer v srednjih in večjih serijah. Sodelujemo s podjetji avtomobilske industrije in strojogradnje v Sloveniji in tujini.

Podjetje ima dolgoletne izkušnje na področju obdelave kovin na CNC obdelovalnih strojih, predvsem sive litine, jekla ter aluminija. Uporabljamo stroje proizvajalcev EMAG ter MAHO. Imamo dvovretenske CNC stružnice EMAG MSC12 (dve z gnanimi ter eno brez gnanih orodij) ter klasične CNC stružnice z enim vretenom proizvajalcev MATRIX CHURCHILL, MAHO in PRVOMAJSKA. Imamo tudi horizontalna CNC obdelovalna centra MAHO MC 600 ter Fritz Werner TC 1.4C, 3D merilnik Zeiss ter še veliko univerzalnih obdelovalnih strojev.

Imamo tudi lasten proizvodni program brusnih orodij s prevleko iz karbidne trdine (spodnja slika: vzorci izdelkov). Izdelamo lahko tudi orodja po željah kupca.

Smo prilagodljivi in sposobni hitrega uvajanja nove proizvodnje. Povprečna starost zaposlenih v podjetju je 30 let.

Podjetje ima certifikat ISO 9001-2000.

Lastnik podjetja: Franc Junc
Vodja nabave: Damir Junc
Vodja proizvodnje: Iztok Rutar
Delovodja: Tomaž Rutar
Poslovna sekretarka: Tjaša Junc

Obdelava kovin Franc Junc s.p. is a small family business, employing fifteen people. It was founded in 1981. We process metal on CNC machines covering middle ranged as well as wider series. We cooperate both nationally and internationally with a number of companies involved in car as well as machine production.

Our company has long-time experience in metal processing on CNC machines, which mostly includes cast iron, steel and aluminum. We mainly use EMAG and MAHO machines but we also own three two-spindle CNC lathe EMAG MSC 12, two with driven tools and one without driven tools, as well as classical CNC lathe produced by the following manufacturers: MATRIX-CURCHILL, MAHO and PRVOMAJSKA. Last but not least, we possess a horizontal CNC centres MAHO MC 600, Fritz Werner TC 1.4C, 3D CNC measuring machine Zeiss, etc.

We have also our own production program of carbide tripped tools (on the picture below: some examples of our products). We can make tools also by the specifications of the customers.

We can easily adapt to new situations and we are capable of quickly introducing a new product. The average age of our employees is thirty.

We are owners of the ISO 9001-2000 certificate.
